ERSO Restraint Anchor

Introducing a new retractable restraint anchor built for behavioral health environments. It gives staff fast intervention when care requires it, then disappears when it doesn't. It's a smarter balance of safety, readiness, and a ligature-resistant room, restored in one simple step.

Ligature-Resistant Design
Restraint anchor retracts completely flush to the furniture surface and locks into place when not in use, mitigating ligature risks.

Spring-Loaded Activation
Authorized users deploy the anchor using a specialized key that activates the spring-loaded mechanism and allows the restraint anchor to rise smoothly into its operational position.

Easy Cleanability
Bleach solutions and hospital-grade cleaners can safely be used for sanitation without affecting the surface material or color.

Made for Norix Beds
Engineered to complement a variety of bed designs, including Attenda, Arcadian, and Prodigy lines.

1. Flush & Locked
Sits flush and locked when not in use

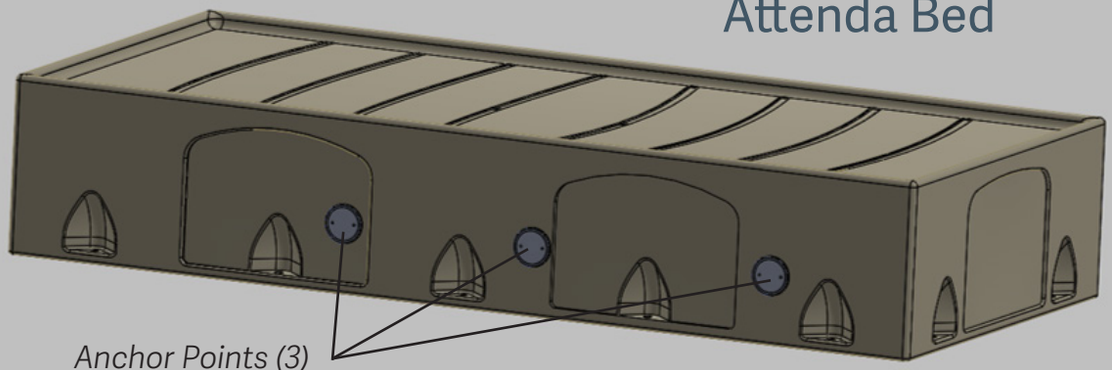
2. Key Activated
Authorized staff insert a specialized key

3. Raised
Spring-loaded anchor rises into position

4. Ready for Use
Key is removed and the anchor is ready for restraints

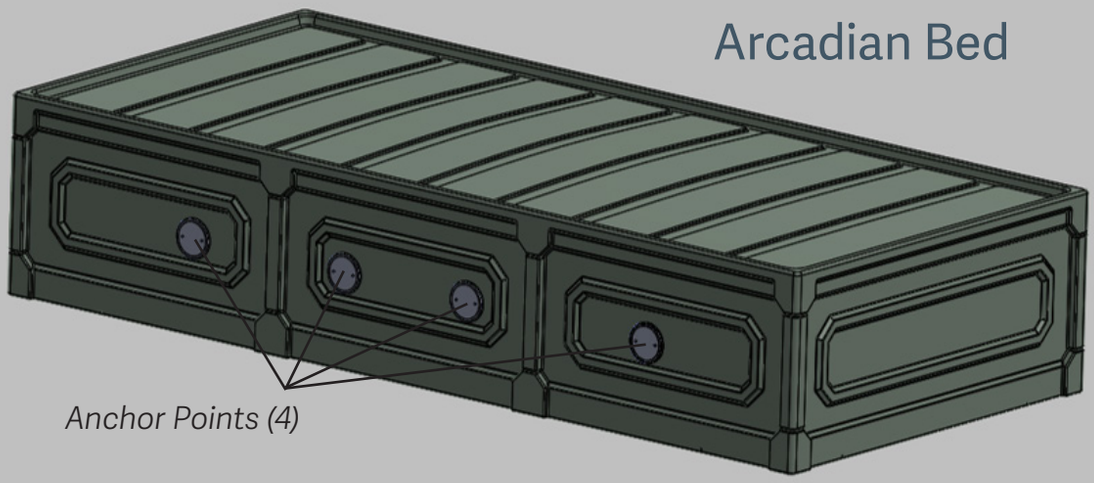
Built to Work with the Beds You Trust

Attenda Bed



Anchor Points (3)

Arcadian Bed



Anchor Points (4)
