NORIX

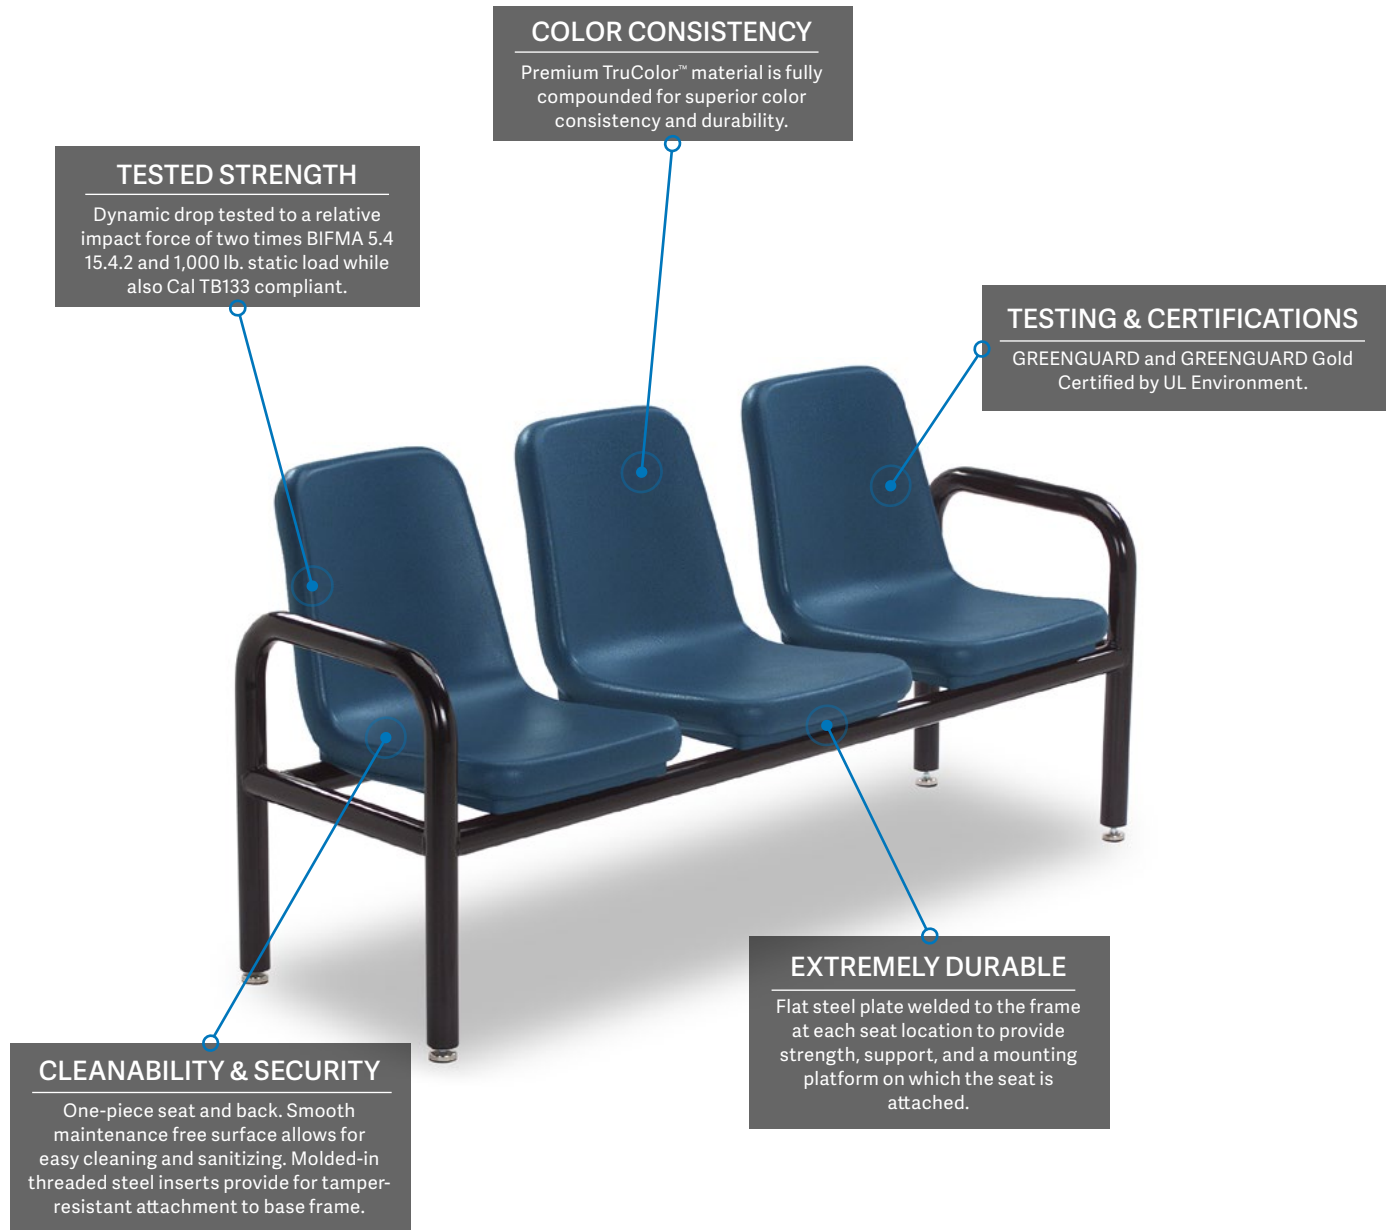

Boulder™ Series

Norix Boulder™ Series Beam Seats have been in use in lobbies and waiting areas throughout the world...and are still going strong and looking good. Why? Because they're built to last, with powder coated tubular steel frames, welded steel plate seat supports, easy to clean molded polyethylene seats, heavy-duty glides and 9 tamper-resistant screws to hold each seat in place.

Innovative Construction

With or without divider arms, the individually molded seats define a single seating area and deter people from using them as a lounge chair or couch. Rotationally molded from specially formulated high-impact polyethylene, the seats are unaffected by most chemicals and cleaning solutions.

Institutional Toughness

2" diameter, 14 gauge steel tube creates the framework for this "defined-space" seating. Boulder seating features full circumference welds at every joint eliminating nuts, bolts and rivets that can loosen over time. Each seat has molded-in threaded inserts and is attached with nine security screws to an 11 gauge steel seat support.

Gibraltar™ Series

Finally, a collection of in-line seating delivers intensive-use security and durability in a sleek, contemporary design. The Gibraltar™ Series is designed specifically for high traffic, institutional environments like waiting rooms, lobbies, dayrooms, visitation, and intake areas. Gibraltar™ is built to survive the rigors of continuous institutional use – and look great doing it.

Comfort by Design

Gibraltar™ starts with a roomy ergonomic seat. The comfortable seat is a full 20" wide, consistent with today's user's changing physiology. Gibraltar™ seats are rotationally molded from durable polyethylene - non-absorbent and easy to clean. Molded-in threaded steel inserts provide for tamper-resistant, "steel-to-steel" attachment to base frame.

Strength and Style

2" diameter, 14 gauge tubular steel -- bent and welded into a distinctive curved frame -- provides the heavy-duty structure for this defined-space seating. With full circumference welds at every joint, Gibraltar's one-piece frame is strong and secure, yet sleek and stylish. Frames are available with tamper-resistant, nylon-bottom glides or bolt-down tabs.
