TESTED DURABILITY

Product tested to 1,000 lb static load.

X-BASE

Years ago, we were challenged to design an institutional-grade table that defined each person's space and hindered the passing of contraband from one individual to another on the opposite side. Our answer was the popular, rugged X-Base Table with its unique "X" base design. Today, the X-Base Table is used in high-security and special needs facilities all across the country.

JUPITER

Sometimes you want a table that is easy to move around. Other times, you'd like that table to stay in one place, but you don't want to bolt it to the floor. Jupiter is designed to be weighted on site to maintain space flexibility and allow for efficient floor maintenance as the needs of an environment change. Loading the base with up to 150 pounds of sand keeps the table solidly in one place. It can still be moved, but not hurled.

STEEL-TO-STEEL CONNECTIONS

Embedded T-nuts secure top to base with tight steel-to-steel connection for maximum long term reliability.

HIGH IMPACT BASE

Rotationally molded with specially formulated high impact polyethylene.

LEG STYLE

Leg Style Tables won't wobble or tip. Legs are solid as a rock. Lean on it with all your weight. That's peace of mind. When you start with 4" diameter 14 gauge tubular steel legs fully welded to 1/4" steel mounting plates, you end up with an incredibly strong, stable and durable table. The Leg Style Table legs are joined to the top using tamper-resistant screws connected to embedded t-nuts, for a secure steel-to-steel connection.

Under & Beyond

The Leg Style table is engineered and built for continuous daily service in any intensive-use environment, but sometimes you want to make sure it stays put.

In addition to super tough, tamper-resistant adjustable glides, we also give you the option of bolt-down tabs... just to be sure.

General Dimensions

MULTI-PURPOSE

Most commercial tables are put together with easily removed screws, nuts, bolts, screw-out glides and snap-on parts. Norix created the Multi-Purpose Table Collection specifically to avoid those attributes so you don't have to think about the possibility of injury by altered furniture parts.

TAMPER RESISTANT

Secure attachments made with embedded T-nuts and Torx head security hardware for tight steel-to-steel connection.

OASIS

If your environment demands a more robust solution for cluster seating, your search is over. This Norix cafeteria seating collection will meet your needs. The Oasis Tables are designed and engineered specifically for dayrooms, dining halls, and visitation areas. Oasis is perfect for situations where users need more back support than traditional stools provide.

STEEL-TO-STEEL CONNECTIONS

Embedded T-nuts secure top to base with tight steel-to-steel connection for maximum long term reliability.

CLEANABILITY

Lightly textured one-piece seamless seat with easy to clean non-absorbent surface.

TAMPER RESISTANT

Secure attachments made with embedded T-nuts and Torx head security hardware for tight steel-to-steel connection.

Safety & Comfort

Oasis' innovative swivel seats allow easy access and provide the comfort of full lumbar support. The molded polyethylene seat shells are durable and easy to clean. Seats attach securely to reinforced, heavy-duty swivel plates with all-steel, tamper-resistant connections.

Strength & Security

A sturdy 14 gauge steel frame gives Oasis its rock-solid foundation. The rugged frame provides seat support and understructure for the table top. The bottom of the vertical seat tube has a fully welded plate that holds either a large-stem adjustable glide or an enclosed, non-removable anchor bolt for floor-mounting.

SCRATCH RESISTANT

High density color impregnated compression molded composite seats are stain and scratch resistant.

STABLE BASE

14 gauge 3" radius legs for reliable structure and easy access cleaning.

Check Out the Legs

Our unique leg design is the key to the form and a function of this high-performance fixed seating. The curved section is fully welded to a vertical seat support and both the seat supports and top supports have 6"x 6"x 1/4" thick steel mounting plates welded on. When you consider that the tube is 3" diameter 14 gauge steel, you understand that we're talking serious structure here.

The bottom of the vertical seat tube has a fully welded mounting plate inset that holds either a large-stem adjustable glide or an enclosed tamper-resistant anchor bolt. No openings to conceal contraband or absorb moisture. We then finish them with black powder coat paint for a tough long-lasting finish.

Additional Features

Tabla's Standard version features laminates that cover the top and sides. The Premium version is produced with a molded plinth base which protects the product from foot traffic, mops and brooms.

Tabla Premium tables have a permanently affixed molded edged laminate on top that creates a rounded perimeter around the table for extra safety and durability. Both Premium and Standard versions can be ballasted to reduce movement, equipped with floor glides and can be used in variety of applications in almost any environment.
