NATURALS PALETTE

The colors from our Naturals Palette have been carefully selected to support a therapeutic environment that helps reduce tension, assists in behavior modification and enhances the safety of both residents and staff.

Research indicates that interiors with an interesting use of color that are not overly neutral can:

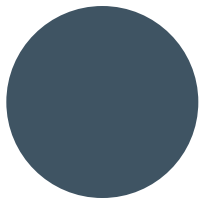

- Balance the mental equilibrium of residents
- Reduce behavioral discord
- Promote dignity and encourage socialization
- Create relaxing environments to enable rest and encourage faster healing
- In general, improve resident and staff morale

When applied with understanding and purpose, color can be used to promote self-confidence, uplift the spirit, soothe the psyche and be a positive distraction among residents. The colors in the Natural Palette have shown to address three primary human elements:

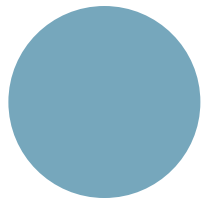

- Familiarity – A sense of connection with the outside world.
- Stress Reduction – Calming and lifting the human spirit.
- Morale Improvement – Humanizing and supporting a feeling of normality.

Each color option in the Naturals Palette is designed to work together to deliver a seamless transition from room to room and promote a sense of health, well-being and sustainability throughout the entire facility.

PATIENT ROOM

By incorporating natural colors and textures into patient rooms, facilities can establish an environment that fosters a healing atmosphere, enhances patient comfort, and supports the therapeutic process. Earthy greens, like Sage, help diffuse patient anxiety and soften their transition to a new environment. A warm, homelike atmosphere can be established by implementing furniture constructed using our unique TruGrain™ polymer formulation, a highly durable and easy to clean polymer designed to mimic the warmth of natural wood.

WELCOMING & WAITING

A good first impression can set the tone for a patient's entire stay. The strategic use of design elements in welcoming and waiting areas, like the use of natural light, soothing colors and comforting textures, help to relax the mind and body. The incorporation of plants and natural wood tones creates a connection to nature that helps blur the lines between interior and exterior, reducing patient apprehension and agitation.

ARTS & CRAFTS

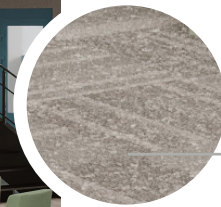

A thoughtfully designed arts and crafts space can become more than a room, it can become an outlet for expression, regulation, and connection. Filled with abundant natural light, warm wood tones, and calming neutral furnishings, this environment creates a welcoming atmosphere that feels safe, familiar, and inspiring. Soft, nature-inspired colors reduce visual overstimulation while providing a timeless backdrop that allows creativity to take center stage.

PLAN

DAYROOM

As the area in which residents spend the majority of their waking hours, it's vital for dayrooms to closely reflect a normalized environment that mirrors life outside the facility. An open-plan concept that provides multiple settings for use throughout the day can help support residents on their journey towards rehabilitation while still maintaining high levels of safety, security and cleanliness. Earthy greens, neutral accents and simple pattern flooring help to promote a calm, relaxed environment.

DINING

Dining areas should employ a combination of design elements to create a warm and welcoming ambiance that allows residents to feel more at ease in a space that may be unfamiliar to them. An open floor plan, coupled with the application of contrasting colors, can help combat a perception of crowdedness in these areas by adding visual interest and depth. The installation of furniture with wood accents helps provide a touch of natural beauty and a sense of familiarity that fosters a homey atmosphere. Patterned fabrics can be used to add energy and liveliness to the space, supporting a pleasant environment for residents to gather and socialize.

ASSESSMENT ROOM

An adolescent healthcare assessment room creates a welcoming, age-appropriate environment designed to help young patients feel comfortable and at ease. Appropriately scaled furniture and colorful seating options provide a sense of choice while supporting comfort, safety, and everyday functionality. A vibrant mural accent wall brings energy and personality to the space, helping the clinical setting feel more engaging, approachable, and human-centered.
