SEATING SERIES

Ripple™ Series

Ripple is a modular seating series that utilizes an intriguing blend of comfort, durability and neuro-aesthetic design principles to promote a positive emotional and psychological experience. Ripple's soft lines bring a gentle, humanizing touch to institutional environments without sacrificing safety or long-term durability.

Features That Matter

Cushioned Comfort

A flexible polyurethane foam filling provides a comfortable cushion without sacrificing durability.

Fluid Resistant

The surface material is impervious to fluids for superior infection control and easy sanitization.

Soothing Surface

The carefully engineered surface texture allows residents to self-soothe, helping de-escalate behavior and promote calmness.

Easy Cleanability

Bleach solutions and hospital grade cleaners can safely be used for sanitation without affecting the surface material or the color of the chair.

Neuro-Aesthetic Design

The simple and repetitive pattern promotes positive emotional and psychological experiences among residents.

Extreme Durability

The heavy-duty, durable design offers enhanced safety for residents and peace of mind for staff – even when positioned in unsupervised spaces.

GreenGuard Gold Certified

The highest level of GreenGuard Certification, this product meets strict health-based criteria for VOC emissions and total chemical emissions.

Fabricated Drip Edge

A built-in waterfall edge prevents fluids from running down the side of the chair and into the base. Fluids will instead drip down to the floor and allow for easier, more thorough sanitization.

Peeling and Puncture Resistant

The one-piece, rotationally molded surface is resistant to peeling and punctures, supporting long-term durability and helping to maintain a safe environment.

Endless Configurations

Eight unique pieces in this modular seating line support an endless number of custom configurations that can fit seamlessly into any environment.

Tamper Resistant

The base of the chair is fastened with Torx secure hardware that is specially engineered to eliminate exposed edges and mitigate any opportunity for tampering.
